Nothing looks so improbable to those who have in valu tried slit the wonderful medicines of the day, as that a semunon weed growing on the pastures and along eid stone walls, should care every humor in to start. There are no if nor ands, hume nor has abest to willing some cases not pours. I pedded over a humar, it has to exist. There are no if nor ands, hume nor these above to the system; jest it is a fixed fact. If you have a humar, it has to the triefly of Beston. I know the effects of it in every case. It has already done some of the greatest care a ver done is higasenchusetts. I give it to children a year old, to old peeple of cirty. I have seen poor, puny, wormy-looking children, whose fisch was soft and flabby, restored to a pricet state of health by one bottle.

To those who are subject to a sick head sche, one bottle will always curs it. It gives great relief in catarrh and distinces. THE ADRIATIC. The Herald of yesterds y morning ascribes the delay in completing this magnificent steamship to the isomiciency of the condensers. It is correct. We have before adverted to the bad joints at the ends of the tubes, but subsequent facts indicate that indiarabber cassed. even with the best workmanship, retain sufficient clear ticity perfectly to allow for the unequal contraction and expansion of the metals. It is therefore possible that the vacuum obtained will be less powerful than origin-

ally hoped, but no other evil results can be anticipated.

The Courier and Enquirer of the same data labors under a mistake. The valve motion is not by any perty considered an infringement on former patents. The writer had probably confounded this with the second some other versel.

From present appearances the Adriatic will be to appleted by Christmas, and will make her trial trip immediately after New Year's. She has all her mashinmediately after New Year's. She has all her machin-ery and a large quantity of coal on board. Steam has been applied, and the wheels revolved with a force sufficient almost to dear the pier itself from its founda-tion. She will be the hest modeled, the strongest, and most powerful steamship afteat, and we predict will beat the Pere's before making three trips.
